**Bright Idea:****Baby's Quiet Sounds Healthy Nursery Baby Monitor**

While no one knows the cause of Sudden Infant Death Syndrome (SIDS), the leading cause of death in infants less than 1 year old, a new baby monitor from Summer Infant may be the answer to reducing your baby's risk. Researchers say overheating, getting tangled in bedding and sleeping on the stomach increase a baby's odds of dying of SIDS. To combat these factors, the parent's unit of the Baby's Quiet Sounds Healthy Nursery Baby Monitor displays the current high and low temperature as well as humidity readings in baby's room. It also features a timer for feeding or medication schedules, a rechargeable battery and a nightlight. The company has partnered with the First Candle SIDS Alliance, and a portion of all sales goes towards research. Available for \$40 at Babies "R" Us stores nationwide. — JR
